

Szczecin, 1st September 2004

Letter of recommendation

We certify that Trap Krzysztof Malak Spółka Jawna with head office at Chłopickiego street 10/1, 71-204 Szczecin was doing painting and sand blasting job with high quality and meticulousness.

In 2004 Trap Krzysztof Malak Sp.j. company has conducted Sa 2,5 sand blasting jobs and anti-corrosive services on Ekofisk 2/4M off-shore construction components for Morska Stocznia Remontowa S.A. in Świnoujście. Coating products were provided by International company. Additionally there were Hummervoll anti-slide lanes coatings applied. Trap Krzysztof Malak Sp.j. company has also applied Chartek coatings, which are used on off-shore constructions and petroleum industry to passively protect from hydrocarbon fire.

Abovementioned jobs were done in presence of MSR, principal and coating representative inspector. At that time there were done sand blasting on the area of approximately 21 000 m², painting jobs on approximately 50 000 m² and anti-slide lanes coatings application on the surface of approximately 3 000 m². The quality of job, visual effect and timeliness perfectly answers world standards.

Therefore we believe that Trap Krzysztof Malak Sp.j. company is trustworthy and able to execute complex anti-corrosion works using coating products of highest standards and where deadlines and high quality should be met.

Morska Stocznia Remontowa S.A.
